Automated Data Transfer

ensuring two-way communication
between hydrogen MEGC/trailer and office

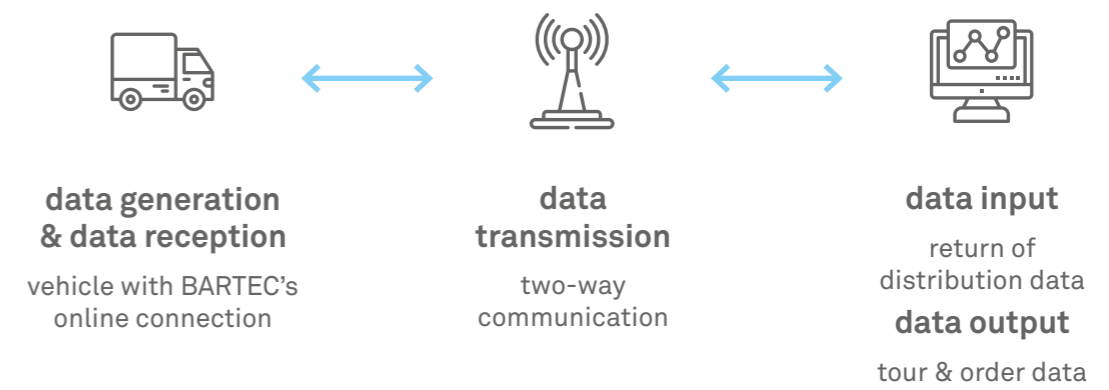

Benefits

- uninterrupted & safe H2 delivery without active intervention
- partial deliveries
- balancing of loaded & unloaded volume
- recording where which quantity was taken
- no undocumented events and operations
- standardized data transfer without need for external OBC

Features

- measuring of loading and discharge quantity
- automatized data transmission between MEGC/trailer and office acc. to FTL standard EN 15969 (two-way communication)
- transport monitoring
- low/high quantity delivery
- automatic unloading process control
- long-time storage of process data
- customizable print-outs
- configurable products
- tour planning
- e-ticketing
- remote support
